

NAGARAJAN BALAGURU

Software Engineer

+91 9003312426 | nnnagarajan16@gmail.com | [linkedin-nagarajan-balaguru/](https://www.linkedin.com/in/nagarajan-balaguru/)

SUMMARY

Results-driven Software Engineer with 3+ years of full-stack development expertise. Specialized in building high-performance, reactive backend systems using Java, Spring Boot, and Spring WebFlux. Proficient in designing scalable RESTful APIs, implementing functional programming patterns, and creating dynamic frontend experiences with React.js. Proven track record of architecting microservices, optimizing API performance through caching and database tuning, and delivering production-ready applications. Passionate about clean code, system design, and leveraging modern technologies to solve complex backend challenges.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend: Java (8+), Spring Boot, Spring WebFlux, Spring Cloud, Project Reactor, RESTful APIs, Functional Programming

Frontend: React.js, Redux, React Hooks, JavaScript (ES6+), HTML5, CSS3

DevOps & Infrastructure: MySQL, Redis, Docker, Kubernetes, Jenkins, Git

EXPERIENCE

Software Engineer — Apexon

Sep 2024 - Present

Remote, Chennai, Tamil Nadu

- Built reactive REST APIs using Spring WebFlux handling 10,000+ requests/second with sub-100ms latency
- Led monolith-to-microservices migration with Spring Boot, reducing deployment time by 40% and improving scalability
- Optimized database queries by 60% through strategic indexing and query tuning
- Implemented Redis caching strategy, reducing database load by 70%
- Set up monitoring with AWS CloudWatch for real-time production debugging
- Automated CI/CD pipelines with Jenkins and Docker, reducing release cycles from 2 weeks to 2 days
- Used Java Streams and Lambdas to reduce code complexity by 25%

Synchrony / SASS TECH — Software Developer

Jan 2023 - Oct 2024

Remote

- End-to-end provider center application with React.js and Spring Boot, improving team productivity by 35%
- Built dynamic UIs with React Hooks and React Router, improving frontend performance by 30%
- Designed and integrated RESTful APIs with proper error handling and validation
- Optimized database queries and caching, improving API performance by 45%
- Led full-stack development with Redux, Spring MVC, Jenkins, and Docker for reliable deployments
- Collaborated with cross-functional teams following Agile/Scrum practices

Full-Stack Developer Intern — Synchrony

Jun 2022 - Jan 2023

Remote

- Developed web-based project management system using Java, Spring Boot, and React.js
- Handled backend, frontend, API integration, and database design end-to-end
- Applied Agile methodologies for timely delivery and production-ready code

EDUCATION

Sri Krishna College of Technology

Tamil Nadu

Bachelor of Engineering in Mechanical Engineering — CGPA: 7.52/10

Sep 2018 - May 2022

ADDITIONAL INFORMATION

Certifications:

Spring Boot & Microservices Fundamentals, Java Functional Programming

Open Source:

Active contributor to open-source Java and React projects

Problem Solving:

Strong algorithmic foundation; regular contributor on technical problem-solving platforms
